

Donor Advised Fund Indirect and Infrastructure Cost Policy

In accordance with the SDG Impact Fund's goal to maximize the social impact of its activities, the Fund limits recipients of SDG Impact Fund grants to allocate a rate of up to 2.5% of granted funds to direct costs, facilities administration, infrastructure, and/or indirect costs. This allocation should be clearly indicated as a separate line item in any proposal or agreement. The rate may only be amended with prior written approval and/or agreement with grant recipients.

This policy may be updated and revised at the Board of Directors discretion and may change from time to time. New standard rates will be published immediately on our website: www.sdgimpactfund.org/forms should there be a change made.
